DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Kumar (U.S. Patent 6,269,080 B1).

For claim 1, Kumar discloses method of multicast file distribution and synchronization, comprising the step of:

delaying a portion of a plurality of messages carried on a communications channel (figure 14A, col. 18 lines 35-41), wherein the delayed portion are data messages (col. 17 lines 46-51).

For claim 6, Kumar discloses the communication protocol is TCP (col. 1 lines 19-20).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2665

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kumar (U.S. Patent 6,269,080 B1) in view of Boccuzzi (U.S. Patent 5,550,868).

For claim 5, Kumar does not disclose wherein the portion of messages are delayed to create a substantially bimodal delay distribution. In an analogous art, Boccuzzi discloses portion of messages are delayed to create a substantially bimodal delay distribution (figure 4, col. 7 lines 48-53). One skilled in the art would have recognized a bimodal delay distribution to use the teaching of Boccuzzi in the system of Kumar. Therefore it would have been obvious to one of ordinary skill in the art at the time invention, to use the bimodal delay distribution as taught by Boccuzzi in Kumar's system with the motivation being to provide the best overall improvement in bit error rate by employing the differential detector with compensation and an equalizer in combination (col. 7 lines 46-48).

Response to Arguments

6. Applicant's arguments with respect to claims 1-3 and 5-6 have been considered but are moot in view of the new ground(s) of rejection.
